## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 11-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Regarding claim 11, the location of the interior layer is not clear since applicant claims the inner cover layer is molded on the core.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3 and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Takemura et al (5,733,977). Regarding claims 1-3, Takemura discloses a golf ball comprising a core and a cover. The golf ball may also be a multi-layer structure of three or more layers (col. 4, lines 55-58). The core is made from a silicone rubber (col. 2,

Art Unit: 3711

lines 26-28). Regarding claim 5, the cover layer may include a two layer cover (col. 4, line 58).

Claims 1 and 4 are rejected under 35 U.S.C. 102(e) as being anticipated by Shimosaka et al (5,730,665). Shimosaka discloses a golf ball comprising a core and a three-layer cover. The interior cover layer is made from a silicone resin (col. 3, lines 55-60).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takemura in view of Nesbitt (4,431,193). Takemura discloses the invention as shown above and further discloses the cover layer must have a thickness from 0.039 to 0.157 inches. Takemura does not disclose the thickness for each individual cover layer. However, Nesbitt teaches a inner cover layer thickness from 0.02 to 0.07 inch and an outer cover thickness from 0.02 to 0.10 inch and an overall golf ball diameter of 1.68 inches. One of ordinary skill in the art would have modified Takemura in view of Nesbitt to achieve the desired flight characteristics.

### ***Double Patenting***

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 9 and 17 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1 and 22 of prior U.S. Patent No. 6,159,110. This is a double patenting rejection.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-8, 10-16, and 18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9 and 22-28 of U.S. Patent No. 6,159,110. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present invention and the '110

Art Unit: 3711

patent claim golf balls comprising a core, an interior layer, an inner cover layer, and an outer cover layer. The core and/or the interior layer include a silicon material.

Rearranging the limitation does not render a patentable distinction.
